

Day 2

ITD creates data files with the latest student data and transmits them to Follett, every afternoon.

Follett receives LAUSD student data, process it, loads it and makes it available to users on their on-line application Destiny.

The warehouse makes data available to all systems

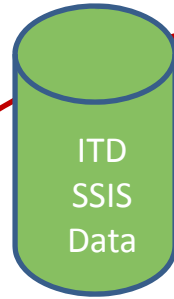

Nightly, ITD collects student information changes from all the secondary schools servers and sends them to a centralized data warehouse for processing

Day 1

Schools update student information, e.g., enrolls students, assign them to classes, drops them out

7am to 5pm

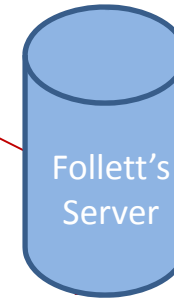

6pm to 10pm

10pm to 4am

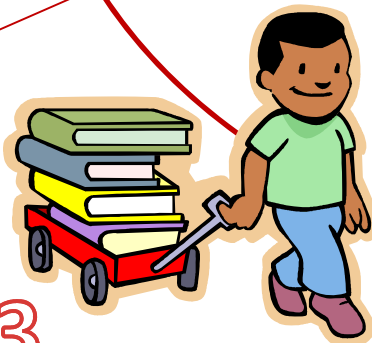

3pm to 4pm

5pm to 4am

ILTSS Student Information Data flow

Day 3

7am

Schools can see patrons, books, student class schedules, teachers, books, etc. in Destiny and books can be checked out to students
